Hands on the Wheel - Eyes on the Road - None Safer and More Productive

Allied Mobile Systems introduces the first of its kind "eyes forward" dash top display for the snow removal industry. This device displays critical spreader control settings just below the truck operators view. As the truck operator adjust spreader functions on their Allied Envision pad or "Forward Controls" integrated steering wheel, the Eyes Forward screen displays current settings. The screen is just below operational sightlines. This way the driver never has to take their eyes off the road, creating a safer, more efficient operation.
